

# Passenger Car Diesel — October 25, 2017

## Course Objectives:

This 1-day course will enable the technician to properly identify, understand and diagnose most recent 1997 and newer passenger car diesel systems. The course will provide a comprehensive overview of diesel technology with a focus on the various low and high pressure fuel delivery methods and diesel emission reduction systems. We will demonstrate troubleshooting techniques with real world videos and graphical animations. The case studies and diagnostic examples are from VW, Audi, Jeep and Sprinter with an overview of the newly released Chevy Cruze with a diesel engine.

## Topics Covered:

- Diesel Combustion Process
- No-Start Diagnostic Tips
- Fuel Quality Driveability Issues
- Fuel Delivery Methods
- Piezo Injector Theory and Operation
- Diesel Emission After-Treatment Systems

Cost (includes course book and lunch):  
Bosch Authorized Dealers: \$249.00  
Non-Members: \$299.00

## Location & Time:

Horseshoe Southern Indiana  
11999 Casino Center Dr. SE  
Elizabeth, IN 47117

8:30 am — 4:00 pm
