

Gasoline Direct Injection — October 4, 2018

Course Objectives:

This course will enable the technician to properly identify, understand and diagnose Bosch GDI engine management systems. Provides a comprehensive overview of GDI operating strategies, intake system, fuel delivery, ignition, exhaust and emissions related components. Demonstrate troubleshooting techniques with real videos and graphical animations. The course will primarily cover VW/Audi, Ford EcoBoost and General Motors GDI systems, but comprehensive enough to cover most GDI systems.

Topics Covered:

- GDI Operating Strategies
- Intake Components
- Fuel Delivery
 - Low Pressure
 - High Pressure
- Ignition Systems
- Exhaust Components
- Emission Components
